The recent flooding in the Philippines caused by Ondoy devastated many Filipinos yet despite this current economic climate, you responded with a support that will have a positive impact to these individuals and families in crisis.

On behalf of the De La Salle Alumni Association of Southern California, we thank you for your generous gift of shoes from your organization that helped filled up the containers.

We just received news that our 1st container has reached its' intended destination safely and will soon be distributed to the needy. Your donation will surely put them back on their feet, figuratively and literally.
